

Our energy insights solutions in a nutshell

Unparalleled energy intelligence

centrica
Business Solutions

The power of energy intelligence

Powering Performance

Our energy insights solutions offer unparalleled real-time, device-level visibility into your entire energy infrastructure that helps you reduce energy costs, proactively manage consumption, and improve operational efficiency

Powering the Future

Our energy insights solutions deliver a wide range of granular and actionable energy intelligence that can help you gain valuable insight into your energy usage and build an actionable, effective energy strategy

Powering Resilience

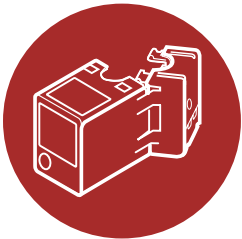

Our energy insights solutions provide predictive analytics and sophisticated alerts that will help you reduce business risk by ensuring the reliability of your equipment, devices, and operational processes

Power your way to business efficiency

Businesses are facing pressure from all sides – intense competition, increased risks and threats to established markets from digital disruption and globalization. At a time when operational efficiency and cost-reduction has never mattered more, turning energy from a commodity cost to a value-adding resource could be just what you need to gain a competitive advantage.

The more you know about your energy, the better you can manage it. By giving you complete visibility of your energy usage, our energy insights solutions let you see exactly how your business uses energy right down to individual equipment or device – giving you the granular energy intelligence you need to reduce energy waste, lower costs, and drive operational efficiencies.

Our self-powered, non-intrusive Panoramic Power wireless sensors collect real-time energy data and analytics from your devices

Our hardware collects real-time data from utility meters (gas, heat, water, and air flow) with pulse outputs, so you can manage a wide range of energy data in a single platform

Smart energy management

Our energy insights solutions consist of our suite of Panoramic Power™ hardware and industry-leading, cloud-based energy management platform, PowerRadar™. Our self-powered, non-invasive Panoramic Power wireless sensors offer unparalleled visibility into your entire energy infrastructure by delivering a wide range of granular and actionable energy intelligence in real-time – including electricity, gas, heat, air flow, and water. Effectively and holistically analyze your energy data, manage consumption, reduce spend, improve operational efficiency, and prevent costly downtime with PowerRadar – or the software of your choice – and use this intelligence to make data-driven decisions that power your energy strategy forward.

The benefits to your business

Comprehensively understand your entire energy infrastructure

Gain complete visibility into how your equipment and operations consume energy with real-time, device-level monitoring of energy.

Proactively manage energy consumption and reduce spend

Real-time visibility of power usage delivers energy intelligence that identifies inefficiencies and waste in your current operations and enables proactive action to reduce costs.

Reduce the risk of device or equipment failure

Avoid costly downtime and extend the life of your equipment with predictive analytics and sophisticated alerts in PowerRadar to ensure your business is ‘always on.’

Is this solution right for you?

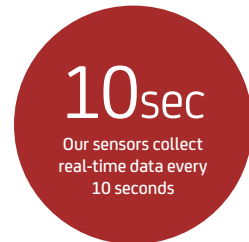

Our energy insights solutions are ideal for any business that depends on operational performance, driving efficiency, maximizing energy spend, and ensuring the reliability of their equipment – businesses that are looking for a simple, powerful and cost-effective way to gain deeper insight into their energy consumption with device-level, real-time energy intelligence that enables them to form data-driven decisions and drive their energy strategy forward.

Why energy insights from Centrica Business Solutions?

Our energy insights solutions can help you turn energy from a commodity cost into a value-driving opportunity for your business. We've already installed our marketing-leading, self-powered Panoramic Power wireless sensors on 4,000 sites in over 30 countries, helping to improve business performance.

Our sensor technology includes a complimentary subscription to our simple and powerful energy management platform, PowerRadar, giving you the flexibility to utilize our software to efficiently visualize and manage the data from your electricity sensors – as well as gas, heat, water, and air flow data from your 3rd party utility meters – in a single, holistic view.

Centrica Business Solutions will partner with you to develop an energy strategy that can give you a powerful competitive advantage. Our broad portfolio of products and end-to-end delivery capability means we can provide a single supplier solution to your every energy need.

Want to know more?

Our energy insights solutions are generating new opportunities across all types of industry. Find out how we can help you power new levels of performance today.
