

# Panoramic Power in a nutshell

Actionable energy insights

Product series  
September 2017

## Panoramic Power – the power of energy insights

### Powering Performance

Panoramic Power will help you reduce energy costs and improve operational efficiency with real-time visibility of your energy usage

### Powering the Future

Panoramic Power can help you gain valuable insight into your energy usage and build an actionable, effective energy strategy

### Powering Resilience

Panoramic Power will help you reduce business risk by ensuring the reliability of your onsite assets

# Power your way to business efficiency

Businesses are facing pressure from all sides – intense competition, increased risks and threats to established markets from digital disruption and globalisation. At a time when operational efficiency and cost-reduction has never mattered more, turning energy from a commodity cost to a value-adding resource could be just what you need to gain a competitive advantage.

By giving you complete visibility of your energy usage, our energy insight solution, Panoramic Power, lets you see exactly how your business uses energy right down to individual equipment or device level – giving you the energy intelligence you need to reduce wasted power and improve your operational efficiency.

**Wireless sensors transmit data from all your energy-using equipment and devices in real-time**

## What is Panoramic Power?

Our energy insights solution, Panoramic Power, gives you visibility into your energy usage. Self-powered, wireless sensors transmit data from all your energy-using equipment and devices in real-time to our cloud-based analytics platform, PowerRadar. The intelligence driven by this data helps you optimise performance, deal with potential equipment failures before they happen, and reduce energy inefficiencies and waste.

## The benefits to your business

### Improved operational efficiency

Real-time visibility of power usage delivers energy intelligence to help you identify and address inefficiencies in your current operation and enables early, pro-active action.

### Unlock value

Analyse your energy consumption data to identify inefficiencies and wastage, reducing energy bills and enabling you to put your budget towards increasing your production.

### Reduce business risk

Avoid costly downtime and extend the life of your equipment with real-time insights and predictive maintenance alerts.

## Is Panoramic Power right for you?

Panoramic Power is ideal for any business looking to gain insights into energy consumption with minimum disruption and maximum cost-effectiveness.

## Why Panoramic Power from Centrica Business Solutions?

Panoramic Power can help you turn energy from a commodity cost into a value-driving opportunity for your business. We've already installed over 43,000 sensors on customer devices around the world, helping to improve business performance.

And that's what Centrica Business Solutions is all about – partnering with you to develop an energy strategy that can give you a powerful competitive advantage. Our broad portfolio of products and end-to-end delivery capability means we can provide a single supplier solution to your every energy need.
