Six steps to securing up to 15 years of Capacity Market revenue

The UK Capacity Market has been established to ensure security of power supply.

As part of this programme the UK government incentivises the inclusion of low-carbon sources of energy, including CHP on-site generation units.

Centrica Business Solutions has proven solutions for connecting your CHP unit to the capacity market, enabling customers to earn up to £250k/MW of revenue¹ from their CHP unit.

To learn how you can unlock the potential of your CHP, contact: centricabusinesssolutions@centrica.com

1

ASSESS

We work with you to understand or set your operating strategy, analyse your half-hourly power data and model your potential value.

2

PREPARE

We provide you with a commercial agreement to include your CHP unit in our Capacity Market pre-qualification application for the T-4 Auctionⁱⁱ in Feb-19 .

3

PRE-QUALIFY

We fully manage your application for pre-qualification, working with you to ensure all required information is correctly lodged before the Sep-18 deadline.

4

AUCTION

We manage your participation in the Capacity Market's T-4 Auction (next held in Feb-19), increasing your chances of success.

5

INSTALL

After being successful in the Capacity Market auction, new units are installed and start generating power, existing units have any modification completed.

6

EARN

We manage your asset across the lifetime of the contract. Your Capacity Market revenue will begin to be realised in Oct-22.
