About us

“We are in the midst of an energy revolution. The economic landscape, developments in technology, evolving business models and consumer behavior are changing at an unprecedented rate, creating more opportunities than ever.”

National Grid Future Energy Report 2017

Power is changing. As new energy sources, insights and technologies emerge, power is more than a commodity and generation is no longer centralized. Businesses are starting to use energy in new ways to take control and gain competitive advantage: increasing resilience, improving operational efficiency and driving their business vision forward. It’s time for you to realize the power of power.

Technology is transforming business

The digital revolution is putting business under pressure like never before. As companies evolve in a competitive environment that becomes increasingly more complex, they continue to face the demands of growth, cost control and risk. At the same time, energy regulation is challenging everyone to use energy more efficiently, and predictability of supply from the grid is no longer as certain as it once was.

Technology is transforming the energy landscape too. New energy sources are appearing, from wind and solar to high efficiency batteries, while supply is becoming decentralized. These changes are putting power in the hands of customers and turning energy from a simple commodity into a critical source of business advantage.

Centrica is responding

As Centrica, our role as a traditional energy supplier is changing. Centrica Business Solutions has been created to develop new thinking, new technologies and new ways of working to help our customers take control of their power, futureproof their business and deliver their long-term goals. Our energy intelligence, products and distributed energy solutions are already powering the ambitions of 2,000 large energy users around the world. From retail and manufacturing to health and education, we help our customers improve operational efficiency, increase resilience, and drive their business vision forward.

Growing energy management complexity is a concern for many businesses

Turn your energy into an opportunity

With advances in technology, the energy market has evolved. The power stations of old are being replaced by smaller power sources close to the site of consumption. Renewables like solar feed in to the grid – and energy can be stored locally and consumed when it’s needed. These ‘distributed energy solutions’ are more affordable, efficient and secure power at the point of use.

Three power plays for business

With end-to-end energy solutions based on actionable insights, we help energy users to make the most of distributed energy to power performance, resilience and their future.

Powering Performance

Improve your operational efficiency

Energy contributes significantly to operational costs and performance excellence. We can improve your energy efficiency and operational performance with our energy insights, new approaches and technologies that optimize your day-to-day processes – and help you achieve your business objectives.

Gain intelligence you can act on using advanced analytics platforms and technologies, providing insights to proactively manage your energy infrastructure.

Optimize your operations, identify opportunities to improve your energy usage, minimize downtime, and reduce carbon emissions.

Simplify your energy management and infrastructure with end-to-end solutions, industry expertise and a range of commercial options.

Performance in action

Mexican restaurant chain operators, CMR Chili’s, wanted to improve its energy use while reducing operational costs and environmental impact. Live energy data provided by our wireless sensors has saved enough energy to power 3.6 restaurants for a month.

"Where once companies saw energy as a cost, now they are seeing it as a source of value and sustainable, competitive advantage.”

Jorge Pikunic, Managing Director, Centrica Business Solutions

Powering Resilience

Keep your business on 24/7

As more businesses become digital, your business systems and information resources can be put at risk when the grid goes down. We can help you keep your business always on and protect against future energy uncertainty.

Ensure your continuity of supply by implementing energy solutions that improve site resilience.

Reduce operational failure by modernizing your infrastructure and building a commercial strategy that minimizes financial risk.

Protect against market change and strengthen your compliance with energy regulation using insights, technology and expert guidance.

Resilience in action

Gateshead Council wanted more flexibility over how they manage their energy. We supplemented combined heat and power (CHP) units with the UK’s largest commercial battery storage facility to deliver energy to the local area and store it to cope with spikes in local demand.

Strategy in action

Alton Towers Resort is one of the largest theme parks in Europe. They wanted a long-term energy strategy for reducing their energy use, utility cost and carbon footprint. We provided a solution that includes a CHP unit, battery storage and energy management systems.

Powering the Future

Drive your business vision forward

As market and technological changes accelerate, existing business models are under pressure, but energy is providing businesses with opportunities to grow in new and innovative ways.

Drive a growth-oriented energy strategy with a distributed energy plan of action that enables your energy services and infrastructure to evolve with your business.

Build leadership through sustainability by delivering on your ambitions with our range of energy solutions, deep expertise and reporting capability.

Take advantage of innovative energy solutions to break free from traditional energy constraints, enabling you to respond quickly to new opportunities, establish new service offerings and access new revenue streams.

Strategy in action

Energy technologies in action

Wherever your business and whatever its energy needs, we’ll help you power your ambitions. Using a combination of centralized and distributed energy technologies, we’ll put you in control of the right energy solutions, in the right place and at the right price.

Distributed energy solutions are now more affordable, efficient and secure than before.

1. Energy efficiency
   e.g. solar panels, LED lighting, heating, ventilation and air conditioning (HVAC)

2. Energy insight

3. Demand response

4. Combined heat and power (CHP)

5. Battery storage

6. Rudox power generation

Our products

Centrica Business Solutions provides end-to-end energy services across a range of areas including:

- **Energy insight**
  Monitor energy use across all your equipment and devices and use the granular insight to reduce waste, save cost and improve your operational efficiency.

- **Energy efficiency**
  Save energy over the long-term and improve your operational efficiency. We’ll meet with you to understand your facilities and use the intelligence to form a comprehensive energy savings strategy.

- **Demand response**
  Generate revenue by reducing your energy use at peak times with intelligent technology that helps you balance supply and demand and manage consumption.

- **Combined heat and power**
  Save on energy costs, reduce CO2 and make your business more resilient by generating your own electricity and heat on site in a single, efficient process.

- **Battery storage**
  Store electricity in low demand periods and use it during high-cost peaks with battery technology. Or sell it back to the grid to generate revenue.

- **Rudox power generation**
  Improve your resilience with back-up power generation on site to support your business and your energy strategy.
Power built around you

Centrica Business Solutions can work with you to provide the right combination of innovative energy solutions and expert advice to deliver the energy strategy your business needs.

“Centrica is in the vanguard of shaping the future – with the customer at the heart of what we do and what we offer.”

Iain Conn, Group Chief Executive, Centrica

Customized to your business
Your goals may be to manage costs, improve operational efficiency, enhance resilience or reduce CO2 emissions. We’ll understand your business needs, using our expertise, experience and products (ours and others) to design the solution that’s right for you.

Easy to work with
From pilots to comprehensive rollouts, our energy specialists make energy management simple – cutting through complexity with straightforward solutions that help you grow your business and drive your business vision forward.

Simpler to manage
We combine new insights, new technologies and new ways of working to connect the dots seamlessly, putting you in control. Our energy management platform gives you clear oversight of performance and allows you to manage everything in one place.

Sustainable growth opportunities
Our global experience and understanding of the regulatory environment means we can help you map your energy landscape, and identify where risks and opportunities lie.

Solid financials
Centrica Group’s scale, reach and knowhow means we can offer a range of commercial options to match your budget and cashflow – and secure your energy ambitions. We’ll also work with you to justify the upfront investment.

Keeping you ahead
In the changing energy landscape, we are leaders in developing and acquiring new technologies and integrating them into our offer. We’ll help you take advantage of innovation in energy to stay ahead.

Deep industry expertise
We have deep expertise in a range of industries and sectors including healthcare, commercial real estate, public sector, retail and leisure, manufacturing and education.

$980m
The amount we are investing in distributed energy globally by 2020.
The power of partnership

Whatever the challenge of your business needs, wherever you are located, we’ll help you make the most of distributed energy to improve your operational performance, increase your resilience and drive your business vision forward.

Working with you

We have a tried and tested three-stage approach to engaging with our customers, to deliver the best solutions for their organization.

Explore First, we’ll get to understand your business including your business objectives. We’ll map your sites and analyze the performance, efficiency and resilience of your existing energy systems.

Plan Then, we’ll identify options to improve your existing energy system and help you achieve your objectives. We’ll score the options and develop an action plan based on the whole life-cycle, including build, maintenance, measurement and financing.

Act Finally, we’ll partner with you to implement the solution, helping you with every aspect of the build, from commissioning and permits, to financing and communication.

“We’re changing the way we relate to our business customers and delivering what they really need: improved operating efficiency, increased resilience and the ability to achieve their business vision sustainably.”

Jorge Pikunic, Managing Director, Centrica Business Solutions

About us

Centrica Business Solutions is part of Centrica – a global energy and services company dedicated to satisfying the changing needs of its customers. With the acquisition of specialist businesses Panoramic Power, ENER-G Rudox, NEAS Energy and REstore, we have expertise in cutting-edge energy insight and prediction, combined heat and power systems, and energy asset management and demand-response aggregation.

As a result, we’re helping more and more customers gain competitive advantage from energy, building intelligent end-to-end energy solutions that power their ambitions. Through Centrica, we also provide energy trading services and supply energy through British Gas in the UK, Bord Gáis in Ireland and Direct Energy in North America.
“The electricity landscape is a prime example of the Fourth Industrial Revolution as it undergoes a transformation, becoming more complex than ever before with rapidly evolving technologies, declining costs, and shifting regulatory landscapes. Three trends in particular are converging to produce game-changing disruptions: electrification, decentralization and digitalization.”
